EDUCATION

Northeastern University, Boston, MA — Sept. 2025 – Present

Khoury College of Computer Sciences — Expected graduation: May 2027

Master of Science in Computer Science, GPA: 3.50/4.00

Related courses: Programming Design Paradigm, Algorithms, Database Management Systems, Foundations of AI

Vellore Institute of Technology, Chennai, India. — Sept 2021– April 2025

Bachelor of Computer Science and Engineering, GPA: 8.30/10.00

Related courses: Object Oriented Programming, Data Structures and Algorithms, Databases, Software Engineering, Machine Learning, Deep Learning, Probability & Statistics

TECHNICAL KNOWLEDGE

Languages:	Java, Python
Frameworks/Libraries:	Flask, PyTorch, TensorFlow, NumPy , Pandas
Testing :	JUnit (JUnit4), Unit Testing, Test-Driven Development (TDD)
Databases:	MySQL, MongoDB
Web technologies:	HTML, CSS, Bootstrap, RESTful APIs
Certifications:	Microsoft Certified: Azure Administrator Associate, Artificial Intelligence and Machine Learning Powered by Google Developers, Foundations of Software Engineering and Data Management Learning by Northeastern University

WORK EXPERIENCE

Summer Research Internship, VIT, Chennai, India — Jun 2024 – Jul 2024

Research Intern

- Developed a CNN-Transformer hybrid architecture to enhance breast cancer classification accuracy for malignant and benign cases.
- Evaluated and integrated multiple pretrained convolutional and transformer-based models to identify optimal components for the hybrid framework.
- Preprocessed, trained, and visualized medical imaging data using NumPy, Matplotlib, and PyTorch, improving model performance over baseline approaches.

PROJECTS

Real Estate Management System — Sept 2025 – Dec 2025

- Developed a full-stack Real Estate Management System using Django and MySQL, with a normalized database (10+ tables), stored procedures, and triggers.
- Implemented secure multi-role authentication (Admin, Agent, Client) and complete CRUD workflows for core business operations.
- Built advanced property search with filtering and data-driven queries for efficient retrieval.
- Designed interactive analytics dashboards for market insights and performance tracking.

Calendar Application — Sept 2025 – Dec 2025

- Developed a modular Java-based scheduling platform using MVC and Swing, supporting multi-calendar management, time zones, and complex recurring events.
- Implemented XML and ICS export for seamless integration with external calendar systems.
- Translated functional requirements into scalable backend features using Java.
- Designed an analytics dashboard to visualize usage patterns and event statistics.
- Created 1000+ JUnit tests to ensure correctness and maintainability of the system.

INTERESTS/ACTIVITIES

- Published Research Paper: "Classification of Benign and Malignant Breast Lesions in Mammograms Using Dense Unified Multiscale Attention Network and Data-Efficient Image Transformers" – Springer's The European Physical Journal Special Topics.
